Cardiovascular Quality Measures: 
Resources and tools to help close care gaps

About 1 in 3 U.S. adults have high blood pressure\(^1\). Having the right tools and resources plays a key role in providing the best care, protecting your reimbursement and meeting your value-based care quality measures.

Here are the cardiovascular measures you need to know.

- Cardiac Stress Imaging
- Atrial Fibrillation/Flutter
- Coronary Artery Disease
- Blood Pressure (BP) control
- Heart Failure
- Ischemic Vascular Disease
- Diabetic Assessment and Control
- Statin Therapy
- BMI Screening and follow-up
- Tobacco Screening
- Alcohol Screening

Pick those that align with your patient population and those you can be successful capturing and reporting.

Support for reporting and care management

- **Better Reporting** – Looking for a way to better evaluate and refine your quality measure performance? McKesson has teamed up with athenahealth and Healthmonix to help evaluate your performance methods in comparison to your peers and recommend measures to help improve your score.

- **Automated Data Capture** – Tired of manually inputting data into your EMR? With RelayMed, you can automatically consolidate and upload your lab results to your EMR.

- **Patient Compliance** – Need help managing patient care plans? Chronic Care Management services from Wellbox can help carry the load, improve patient outcomes and reimbursement.
