Always be ready for your next inspection.

Your paperless route to accreditation.

Forget about searching through extensive manuals to find the requirements needed by each state and accreditation body such as AAAHC, AAAASF, Medicare, and The Joint Commission.

Whether you are preparing for your first inspection or for an on-going one, MedTrainer’s Accreditation Tool helps you to easily interpret and document compliance and significantly reduce the time and labor spent on preparing for surveys.

From daily crash cart checkups to yearly emergency drills, MedTrainer's Accreditation Tool auto-populates the tasks required to maintain accreditation based on your facility’s accrediting agency and state regulations, dramatically reducing the time invested in specific task management.

Streamline your credentialing and attestation processes.

From single-provider practices to complete hospital systems, easily manage all your providers’ information with automated credentialing.

• Automated license and primary-source verifications
• Migrate to an entirely digital, cloud-based platform
• Easily run background checks on databases such as SAM, OIG, or DEA
• Notify users if an expiration date is approaching for any credential or certification

1 Fill your facility information
2 Select your accreditation agency
3 Set up your users
4 Monitor their tasks
5 Paperwork will always be ready for inspection!

| MedTrainer has a fully functional learning management system allowing for:  
  • Individual and group learning  
  • Meeting regulatory compliance initiatives  
  • Preparing for accreditation and surveys  
  • Easy tracking and management of education throughout any organization  
  • Cloud technology enables learners to utilize the system from anywhere on any device | Take control of compliance within your organization utilizing compliance management tools to bring all aspects of compliance together for:  
  • Policies and procedures  
  • Contract Management  
  • Risk and Incident Reporting  
  • Equipment Maintenance Logs  
  • SDS Sheet Management  
  • License and Credential Management | Unlike most software services, MedTrainer dedicates important resources to your organization such as:  
  • Assistance with Account Setup and Employee Onboarding  
  • Ongoing Administrative Training  
  • Dedicated Account Manager Access  
  • Additional Support for Outsource Administrative Compliance Management if needed |

**Plenty of game-changing benefits:**

• Ensure mandatory activities with **clinical and non-clinical checklists and task creation**. An accurate roadmap to ensure mandatory activities are completed.

• **Measure patient and employee satisfaction with surveys.** Send them directly from your Accreditation Tool to get feedback, statistics, and generate reports.

• **Be up to date with industry standards.** Receive instant notifications directly in your portal any time an accreditation requirement changes.

• **Always be ready for inspection** with instant access to reports, logs, and data, which can be downloaded and printed if needed.

• **Enable all staff to submit incident reports electronically** – customized to what your organization tracks. Document any type of incident, including near-misses and adverse events.

• **Obtain accurate reports of your day-to-day facility operation** on matters such as QAPI, medication expirations and errors, and mechanical failures.

*MedTrainer: the all-in-one solution for compliance, training, credentialing, and accreditation.*

*Honored with the MedTech Breakthrough Award 2018 for Best Compliance Management Solution Provider and the 2018 Stevie Silver American Business Award.*
