Dear Valued Customer,

PDI has been monitoring the COVID-19 epidemic (SARS-CoV-2 virus), previously identified as 2019 Novel Coronavirus (2019-nCoV), to provide you the most current information to help manage this outbreak. The CDC has recently issued additional recommendations for surface disinfection, including recommendations for the use of an EPA-approved disinfectant with emerging viral pathogens claims. This letter supersedes our previous letter issued on January 30, 2020.

Super Sani-Cloth® Wipes, Sani-Cloth® AF3 Wipes, and Sani-Cloth® Bleach Wipes meet the criteria for the EPA emerging viral pathogens claim. PDI has submitted the addition of the required language for this claim on these master labels to the EPA and is awaiting expedited approval. Recently launched products, including Sani-Cloth® Prime Wipes, Sani-Prime® Spray, Sani-24® Spray, and Sani-HyPerCide™ Spray already have the EPA emerging viral pathogens claim on their master labels.

The SARS-CoV-2 virus still has not been made readily available by the CDC for testing. The CDC states: "If there are no available EPA-registered products that have an approved emerging viral pathogens claim for COVID-19, products with label claims against human coronaviruses should be used according to label instructions." The following PDI products have label claims against human coronaviruses:

Table with 3 columns: PDI Product Name, Reorder No., Product Description. Lists various Sani-Cloth, Sani-Prime, and Sani-24 products with their respective reorder numbers and descriptions.

As this is a rapidly evolving situation, we will continue to monitor the CDC website and resources for updates and further guidance. In the meantime, we recommend that the general public continues to observe good personal hygiene practices, including hand washing, respiratory hygiene and cough etiquette, as well as surface disinfection using an EPA-registered product.

We will provide you with updates as they become available.

Best Regards,

Kathy O'Sullivan, M.S., M.S.J., RAC
Sr. Director Regulatory Affairs
