

NOW AVAILABLE

McKesson Connectivity API Gateway

Seamless, secure integration for health systems,
third-party vendors and direct customers

Healthcare organizations need the ability to integrate quickly and manage their integration on their own timeline, without the delays and complexity of traditional onboarding. The McKesson Connectivity API Gateway delivers a fast, secure and transparent way to connect with McKesson Medical-Surgical, helping you streamline operations.

Get ready for:

- **Fast onboarding:** Get connected quickly and on your own schedule
- **Real-time visibility:** Track orders and invoices instantly
- **Built-in security:** End-to-end protection for your data and transactions
- **Scalable performance:** Designed to grow with your business
- **Streamlined integration management:** Easy onboarding and updates as needs evolve

Accelerate performance with proven capabilities

The McKesson Connectivity API Gateway enables direct system integration from your existing platforms, whether you're utilizing a third-party procurement tool or internal software solution. Now, you can reduce manual work and streamline your operations through real-time integrations that improve efficiency.

- Submit and track orders (ship-to-customer or ship-to-patient)
- Retrieve invoices and order history
- Manage patient adds and updates
- Access a sandbox environment for testing
- Continuous updates based on customer feedback

Experience the future of healthcare connectivity.
