

AccuVax[®] – Automated vaccine solutions simplified

Manage your vaccines seamlessly

Vaccine management doesn't have to be time consuming. TruMed[®] can help. TruMed[®] offers a solution for all your vaccine handling needs. With the power of automation and centered on patient safety, AccuVax[®] is your answer for vaccine management from start to finish.

The AccuVax[®] Vaccine Management System is an all-in-one integrated fridge and freezer that helps with vaccine inventory. From accessing dose-level inventory with the touch of a finger to automatic checks on common vaccine errors before dispensing, AccuVax[®] makes vaccine storage handling and dispensing simple.

Better inventory visibility for better patient health

- **Track and report every dose**, from receipt to patient administration
- **Avoid stockouts with low inventory alerts**
- **Reallocate stock quickly as needed**
- **AccuVax[®] automatically locks down expired and recalled vaccines**, eliminating potential administration errors and allowing you to accurately track correct medication, dosed to the correct patient, in less time

Protect vaccine integrity with temperature management

- **All-in-one fridge and freezer system** protects both refrigerated and frozen vaccines
- **Door-less design** helps ensure temperature stability
- **Integrated drawer** allows for inventory control of refrigerated packages and odd sized medications

Enjoy better regulatory compliance with automatic logging and reporting

- **AccuVax[®] automates** Center for Disease Control (CDC) adult and pediatric immunization schedules
- **Easy access to reporting** including temperature logs, inventory stock reports and VFC reporting.
